#### **DETAILED ACTION**

## Claim Objections

1. Claim1 is objected to because of the following informalities: In line 6, the phrase, "an upright " has been repeated twice. Appropriate correction is required.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marovskis (5,076,457) in view of Gyenge et al. (4,674,647). Marovskis '457 discloses a collapsible container comprising: a base member having a bottom wall (22), a pair of first base wall portions and a pair of second base wall portions (raised border 38), the base wall having a recess base area (aperture 48) formed therein; a pair of first opposed walls pivotalbly attached to a corresponding one of the first base wall portions and orientable between and upright orientation and an overlapping folded orientation, each of the opposed walls generally corresponding in height and each having at least one projection member (49 & 52) arranged to be received within the recessed area of the wall portions when in the overlapping folded orientation, and wherein one of the first opposed walls has a recessed wall area (50) arranged to receive the projection member of an other first opposed wall folded therein. See Figures 1-3 embodiments. Marovskis '457 does not appear to disclose a second pair of similar opposed walls. Gyenge '647

Art Unit: 3728

discloses a collapsible container with two sets of similar opposed walls pivotable attached to a corresponding base wall to better hold and maintain the items stored therein. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide addition similar opposed walls to the collabsible container of Marovskis '457 as taught by Gyenge '647 to better support and hold the items being stored therein. Furtheremore, it has been held that mere duplication and rearranging of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. V. Bemis Co., 193 USPQ 8 and In re Einstein, 8 USPQ 167.

#### Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are collapsible container's analogous to applicant's invention.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M Mohandesi whose telephone number is (703) 305-7015. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (703) 308-2672. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
